Department of Systems Engineering and Operations Research
George Mason University

The Department of Systems Engineering and Operations Research at George Mason University invites applications for a tenure-track position at the Associate Professor level in the area of systems engineering. We are especially interested in candidates with a research interests in systems architecting, design, modeling, assessment and integration. Individuals with research experience in design and analysis of complex systems are particularly desired.

Candidates must have an earned Ph.D. in systems engineering, industrial engineering or related fields of study, and an excellent record of teaching and research. The successful candidate will be expected to teach in the department’s undergraduate and graduate programs, and to develop a strong, leading-edge research program that includes scholarly publication, research funding, and doctoral student supervision. Candidates with the ability to establish research programs with federal sponsors and industry, and with experience in collaborative multidisciplinary research are particularly encouraged to apply.

Named by US News and World Report as the number one university to watch, George Mason University is a growing, innovative, entrepreneurial institution with national distinction in several academic fields. Enrollment is over 32,000 with students studying in over 100 degree programs. Located only minutes from Washington D.C., in the region with the highest concentration of systems engineers in the country, Mason provides unparalleled opportunities in research as well as strong alliances with business, industry, and government.

The faculty of the Systems Engineering and Operations Research Department maintains an outstanding reputation in a broad variety of research areas. The department is home to 17 faculty members, whose combined research expenditures in the last fiscal year exceeded $4 million. Further information about the department can be found on its website at www.seor.gmu.edu. Questions about the position should be directed to Professor Leonard Adelman, SEOR Search Committee Chair at ladelman@gmu.edu.

For full consideration please submit application and application materials on-line at http://jobs.gmu.edu (position number F9324z). To apply online you will need a statement of professional goals including your perspective on teaching and research, a complete CV with publications, and the names of four references. Review of applications will begin in mid August 2010, and will continue until the position is filled. George Mason is an equal opportunity employer. Minorities and women are strongly encouraged to apply.
