ESD NEWS

The Third International Engineering Systems Symposium (co-sponsored by CESUN, ESD, and TU Delft) was an overall success with over 200 people in attendance. More than a dozen ESD professors and students participated in the three-day event held in Delft focusing on Design and Governance in Engineering Systems. To watch some of the lectures from the symposium check out the video clips from June 18-20, 2012 here. A CESUN 2012 testimonial page addressing some of the highlights from the perspective of the PhD students and a few of the professors who attended will be coming shortly.

***

An updated ESD Faculty Summer Reading List can be found here for future reference, along with the most current working papers here. To find a paper chronologically click here, for alphabetically here.

***

The new Systems Architecture Lab website is up and running, which both Professor Ed Crawley and Lecturer Brian Cameron help run. Please take a moment to check it out.
